4- SAFETY & LOSS PREVENTION PROGRAM

General Policy

The following is an overview of the safety, Loss Prevention, QA/QC Program and scope of training offered by SROUR ARABIA Co. For Contracting to maintain a vigorous accident prevention program, thereby eliminating human distress and financial loss. We place great emphasis on the comprehensive program, which is aggressively carried out, throughout all level of the company. The Senior Safety Officer administrates the program with the assistance of the Safety Supervisors.

SROUR ARABIA Co. For Contracting's primary area of emphasis is on accident prevention. Knowledgeable and safety conscious employees utilizing good techniques and equipment are the cornerstones of the company's accident prevention policy. Accident can be avoided by using good judgement and common sense. Our workforce and supervisors are well conversant with the recognition of hazards associated with their jobs and we insist our employees work safely by complying with all necessary precautions. Our accident prevention program includes training and education. Each new arrival in the company receives a safety introduction course administrated by the Safety Officer. The administration includes the proper use of protective equipment, hazards which may be encountered on a particular job and a discussion on the individual responsibility in avoiding injury or damage, fire prevention also a demonstration on operating fire extinguishers, and how to render primary first aid.

We expect that all projects will be carried out with a high degree of safety for all concerned. It is mandatory for all employees to follow the established safety standards and methods of enforcing them, to ensure safe working conditions. All members of our management and supervisors of all grades are well aware that safety must take equal importance with cost and construction and that they have a moral and legal responsibility to follow the company standards.

Our company Safety Officers are responsible for achieving our goal of "NO ACCIDENT" by conducting weekly safety meeting to improve existing work methods and daily job site inspection to recognize unsafe condition and to ensure legal and contractual requirements affecting safety and health are complied with. The Safety Officers will also be responsible to investigate any injury to personnel or loss or damage to equipment and material and record a monthly safety report. Prior to commencement of work, arrangements will be made for first aid and facilities for prompt attention to injured, in accordance with Saudi Arabia law.
